## **COLLEGE NOTICE**

### **HEADS OF DEPARTMENT, FACULTY OF ENGINEERING**

---

The Faculty of Engineering has made the following extensions to Head of Department appointments.

#### **HEAD OF THE DEPARTMENT OF MATERIALS**

Professor Peter Haynes has accepted an extension to his appointment as Head of the Department of Materials until 30 June 2023.

Professor Haynes is Professor of Theory and Simulation of Materials and has been Head of the Department since July 2015.

His research focuses on the development of new methods for performing quantum-mechanical simulations and their application to materials science, nanotechnology and biological systems. He is an author of the ONETEP code, a linear-scaling code for quantum-mechanical calculations based on density-functional theory, and was awarded the Maxwell Medal and Prize for Computational Physics by the Institute of Physics in 2010.

#### **HEAD OF THE DEPARTMENT OF ELECTRICAL AND ELECTRONIC ENGINEERING**

Professor Eric Yeatman FEng, FIEEE, has accepted an extension to his appointment as Head of the Department of Electrical and Electronic Engineering until 31 August 2023.

Professor Yeatman is Professor of Micro-Engineering and has been Head of the Department since September 2015.

His current research interests are in energy sources for wireless devices, radio frequency and photonic MEMS, and sensor networks. He is a non-executive director of IC Consultants Ltd, and co-founder and non-executive director of Microsaic Systems plc, the first company to produce compact mass spectrometers. He was awarded the Royal Academy of Engineering Silver Medal in 2011, and was made a Fellow of the Academy in 2012.
