

**MSc Computing (Security and Reliability)**

This document provides a definitive record of the main features of the programme and the learning outcomes that a typical student may reasonably be expected to achieve and demonstrate if s/he takes full advantage of the learning opportunities provided. This programme specification is intended as a reference point for prospective students, current students, external examiners and academic and support staff involved in delivering the programme and enabling student development and achievement.

**Programme Information**

Programme Title	Computing (Security and Reliability)			
Award(s)	MSc			
Programme Code	G5U21			
Awarding Institution	Imperial College London			
Teaching Institution	Imperial College London			
Faculty	Faculty of Engineering			
Department	Department of Computing			
Main Location of Study	South Kensington Campus			
Mode and Period of Study	1 academic year, full-time			
Cohort Entry Points	Annually in October			
Relevant <a href="#">QAA Benchmark Statement(s)</a> and/or other external reference points	<a href="#">Master's Degrees in Computing</a>			
Total Credits	ECTS:	90	CATS:	180
<a href="#">FHEQ Level</a>	Level 7			
<a href="#">EHEA Level</a>	2 <sup>nd</sup> cycle			
External Accreditor(s)	<a href="#">BCS - The Chartered Institute for IT</a> <a href="#">The IET (The Institution of Engineering and Technology)</a>			
<b>Specification Details</b>				
Student cohorts covered by specification	2021-22 entry			
Person responsible for the specification	Dr Fariba Sadri, Director of PG Studies			
Date of introduction of programme				
Date of programme specification/revision	October 2021			

## Programme Overview

This taught postgraduate course is aimed at students who may not have studied computing exclusively but who have studied a considerable amount of computing already.

If you want to become a specialist in a particular area of computing, this course will provide a first crucial step towards that goal.

This course specialises in the processes and mechanisms by which computer-based equipment, information and services are protected from unintended or unauthorised access. We also offer specialisms in:

- Artificial Intelligence and Machine Learning;
- Computational Management;
- Software Engineering;
- Visual Computing and Robotics.

Each specialism has a flexible mix of breadth and depth, consisting of two or three compulsory modules as well as choices from a selection of core and optional modules.

We use digital technology to bring further benefits to our education programmes, drawing from investments made and skills gained during the pandemic. We deliver our education as a useful blend of face-to-face and digital learning. This will also prepare our students well for a more hybrid work culture of the future.

## Learning Outcomes

The Imperial Graduate Attributes are a set of core competencies which we expect students to achieve through completion of any Imperial College degree programme. The Graduate Attributes are available at: [www.imperial.ac.uk/students/academic-support/graduate-attributes](http://www.imperial.ac.uk/students/academic-support/graduate-attributes)

### Knowledge and Understanding of:

- Practical programming skills;
- The detail and essential topics relevant to the students' chosen option and project areas, such as Software Engineering;
- Communication skills, including project design, teamwork, written and oral reports and presentations and literature search, both web-based and hard copy;
- Emerging trends in Computing and an awareness of how these techniques can be adapted in industrial applications;
- Practical programming skills in Prolog and Matlab;
- Research skills, including time management, research effectiveness, personal effectiveness, writing skills, presentation and communication skills, technical presentation and critical reading of literature.

### Intellectual Skills:

- Match problems to tools and techniques most suitable for solving them;
- Analyse computing and computing related problems and devise solutions to them;
- Develop an understanding and practice of more advanced computing topics, including databases, concurrent programming, artificial intelligence and distributed systems – in

particular Architecture; Artificial Intelligence; Biomedical Applications; Computational Management Science; Creative Industries; Distributed Systems; Software Engineering and Visual Information Processing;

- Plan, conduct and write-up a programme of software development conducted in a team;
- Plan, conduct and write-up a programme of original research and software development.

**Practical Skills:**

- Design and develop programs of varying levels of complexity using Prolog, Matlab and other languages;
- Use computing tools and techniques, for instance software development tools;
- Analyse computing and computing related problems and devise solutions to them;
- Give technical presentations;
- Appreciate the needs of end-users and issues related to design, management and performance of large scale software;
- Prepare technical reports;
- Conduct detailed literature searches;
- Conduct in-depth research on tools and languages available on line.

**Transferable Skills:**

- Communicate effectively through oral presentations, computer presentations and written reports;
- Program in the major computer programming paradigms;
- Integrate and evaluate information from multiple and diverse sources;
- Work within and contribute to a team, apply management skills such as coordination, project design and evaluation and decision processes as applied in software engineering;
- Manage resources and time;
- Transfer techniques and solutions from one area to another;
- Learn independently with open mindedness and critical enquiry;
- Learn effectively for the purpose of continuing professional development.

**Entry Requirements**

Academic Requirement	Minimum requirement is a first-class degree in a subject with a substantial computing component.
English Language Requirement	<a href="#">Higher requirement</a> Please check for other <a href="#">Accepted English Qualifications</a>

**Learning & Teaching Strategy**

Scheduled Learning & Teaching Methods	<ul style="list-style-type: none"> <li>• Lectures</li> <li>• Tutorials</li> <li>• Practical work</li> <li>• Laboratory</li> <li>• Group work</li> </ul>
Project and Placement Learning Methods	<ul style="list-style-type: none"> <li>• Research project</li> </ul>

## Assessment Strategy

### Assessment Methods

- Written examinations
- Coursework
- Laboratory work
- Presentations
- Product demonstration
- Technical report
- Dissertation

### Academic Feedback Policy

Feedback will be provided on coursework within two weeks of submission. This will be in the form of, for example:

- Personal discussion
- Discussions in small-group tutorials
- Marked-up coursework, laboratory exercises or tests
- Verbal presentation, e.g. during or after lectures
- Written class-wide summaries
- Interactive problem solving sessions
- Model answers to coursework

In lieu of feedback on examinations, selected examination questions are routinely set as unassessed problems in the following year, with model answers provided.

### Re-sit Policy

In line with College policy, students who are unsuccessful in any of their examinations may usually be allowed an opportunity to re-sit at the discretion of the Board of Examiners.

Specific information regarding re-sits for Taught Master's degrees can be found in the relevant Academic Regulations available at: <https://www.imperial.ac.uk/about/governance/academic-governance/regulations/>

### Mitigating Circumstances Policy

Students may be eligible to apply for mitigation if they have suffered from serious and unforeseen circumstances during the course of their studies that have adversely affected their ability to complete an assessment task and/or their performance in a piece of assessment.

The College's Policy on Mitigating Circumstances is available at: <https://www.imperial.ac.uk/about/governance/academic-governance/academic-policy/exams-and-assessment/>

## Assessment Structure

### Marking Scheme

**In order to PASS the MSc students have to satisfy all of the following requirements:**

1. An aggregated mark of at least 50% on 9 components which must be made up as follows:
  - a. The assessments of 6 taught modules. The taught modules must be from the specified list for the specialism, and must include all that are compulsory.
  - b. The assessments of either a further 3 modules courses freely selected from any of the modules offered to the specialism, or 2 such taught modules and 1 ISO, which can be, but need not be, in the area of the specialism.
2. Normally, a mark of at least 50% on each of the 9 components. No mark below 40% is accepted as a condoned pass mark.
3. A mark of at least 51% on the individual project.

**In order to be considered for the MSc with MERIT students have to satisfy all of the following requirements:**

1. Pass the MSc, but without DISTINCTION;
2. An aggregated mark of at least 60% on the 9 components;
3. A mark of at least 61% on the individual project.

**In order to be considered for the MSc with DISTINCTION students have to satisfy all of the following requirements:**

1. Pass the MSc;
2. An aggregated mark of at least 70% on the 9 components;
3. A mark of at least 71% on the individual project.

**Indicative Module List**

Code	Title	Core/ Elective	L&T Hours	Ind. Study Hours	Place- ment Hours	Total Hours	FHEQ Level	ECTS
COMP97088	MSc Computing (Specialist) Individual Project	Core	See module leader			1125	7	45
COMP96015	Network and Web Security	Elective (A)	See module leader			125	6	5
COMP96017	Advanced Computer Architecture	Elective (A)	See module leader			125	6	5
COMP97012	System Performance Engineering	Elective (A)	See module leader			125	6	5
COMP96032	Type Systems for Programming Languages	Elective (A)	See module leader			125	6	5
COMP97005	Scalable Software Verification	Elective (A)	See module leader			125	7	5
COMP97008	Concurrent Processes	Elective (A)	See module leader			125	7	5
COMP97012	Privacy Engineering	Elective (A)	See module leader			125	7	5
COMP97016	Scalable Systems and Data	Elective (A)	See module leader			125	6	5
COMP97035	Complexity	Elective (A)	See module leader			125	7	5
COMP97037	Software Reliability	Elective (A)	See module leader			125	7	5
COMP97109	Advanced Computer Security	Elective (A)	See module leader			125	7	5
COMP97045	Principles of Distributed Ledgers	Elective (A)	See module leader			125	7	5
COMP97146	Program Analysis	Elective (A)	See module leader			125	7	5

**Indicative Module List**

Code	Title	Core/ Elective	L&T Hours	Ind. Study Hours	Place- ment Hours	Total Hours	FHEQ Level	ECTS
COMP97053	Software Engineering for Industry	Elective (A)	See module leader			125	7	5
COMP97061	Probabilistic Inference	Elective (A)	See module leader			125	7	5
COMP97065	Mathematics for Machine Learning	Elective (A)	See module leader			125	7	5
COMP97067	Modal Logic for Strategic Reasoning in AI	Elective (A)	See module leader			125	7	5
COMP97014	Cryptography Engineering	Elective (A)	See module leader			125	7	5
COMP96005	Logic-Based Learning	Elective (B)	See module leader			125	6	5
COMP96007	Computer Vision	Elective (B)	See module leader			125	6	5
COMP96009	Graphics	Elective (B)	See module leader			125	6	5
COMP96011	Custom Computing	Elective (B)	See module leader			125	6	5
COMP96019	Robotics	Elective (B)	See module leader			125	6	5
COMP96025	Operations Research	Elective (B)	See module leader			125	6	5
COMP96027	Distributed Algorithms	Elective (B)	See module leader			125	6	5
COMP97022	Advanced Computer Graphics	Elective (B)	See module leader			125	7	5
COMP97025	Computational Finance	Elective (B)	See module leader			125	7	5

**Indicative Module List**

Code	Title	Core/ Elective	L&T Hours	Ind. Study Hours	Place- ment Hours	Total Hours	FHEQ Level	ECTS
COMP97111	Deep Learning	Elective (B)	See module leader			125	7	5
COMP97055	Computational Optimisation	Elective (B)	See module leader			125	7	5
COMP97115	Natural Language Processing	Elective (B)	See module leader			125	7	5
COMP97059	Knowledge Representation	Elective (B)	See module leader			125	7	5
COMP97070	Independent Study Option	Elective (B)	See module leader			125	7	5
COMP97151	Introduction to Machine Learning	Elective (B)	See module leader			125	7	5
COMP97091	Advanced Databases	Elective (B)	See module leader			125	7	5
COMP97155	Decentralised Finance	Elective (B)	See module leader			125	7	5
COMP97159	Scheduling and Resource Allocation	Elective (A)	See module leader			125	7	5
COMP97157	Robot Learning and Control	Elective (B)	See module leader			125	7	5
COMP97083	Prolog	Elective (B)	See module leader			125	7	5

<http://www.imperial.ac.uk/about/governance/academic-governance/regulations/>

Imperial College is an independent corporation whose legal status derives from a Royal Charter granted under Letters Patent in 1907. In 2007 a Supplemental Charter and Statutes was granted by HM Queen Elizabeth II. This Supplemental Charter, which came into force on the date of the College's Centenary, 8th July 2007, established the College as a University with the name and style of "The Imperial College of Science, Technology and Medicine".
