

Programme Information		
Programme Title	Programme Code	HECoS Code
Cardiovascular and Respiratory Healthcare	A314	For Registry Use Only

Award	Length of Study	Mode of Study	Entry Point(s)	Total Credits	
				ECTS	CATS
MSc	1 calendar year – 12 months	Full-time	Annually in October	90	180
PG Diploma	6-9 months, depending on module choice	Full-time	Annually in October	60	120
MSc	2 calendar years – 24 months	Part-time	Annually in October	90	180
PG Diploma	18-21 months depending on module choice	Part-time	Annually in October	60	120
PG Certificate	6-9 months depending on module choice	Part-time	Annually in October	30	60

Students must apply for the award with which they exit. Therefore, applicants must apply for the MSc OR PG Diploma OR PG Certificate. (also see: Progression and Classification Programme Specific Regulations)

Date of introduction of programme		October 18	
Date of programme specification/revision		July 22	

Programme Overview
<p>The Cardiovascular and Respiratory Healthcare programme provides academic and research training in a wide range of aspects associated with the clinical management of cardiovascular and respiratory healthcare.</p> <p>The full-time MSc consists of four core modules including:</p> <ul style="list-style-type: none"> • Foundations of Cardiovascular and Respiratory Sciences: integrating physiology, and pathophysiology knowledge of the cardiovascular and respiratory systems • Study Design: developing research skills, such as critical analysis, data analysis and interpretation • Reflection & Evaluation of Clinical Practice: one-to-one learning from clinical experts with individual reflective practice • Quality in Healthcare: reviewing political and societal influences on cardiovascular & respiratory healthcare and review changing global influences <p>You will also have the opportunity to choose three elective specialist modules, allowing you to focus your learning around your areas of interest within cardiovascular and respiratory healthcare.</p> <p>The MSc will complete with a research project, giving you the opportunity to explore your research interests in depth. The research project will enable you to translate your learning in order to design, conduct and disseminate your own research in the field of cardiovascular and respiratory healthcare.</p> <p>For MSc part-time, PGDip and PGCert modes of study, please refer to the Programme Structure section.</p>
Learning Outcomes
<p><u>Aim:</u> On graduating from this programme you will have developed the knowledge and skills to enhance your leadership in your chosen field of cardiovascular & respiratory healthcare.</p> <p><u>Postgraduate certificate:</u> On successful completion of PG Certificate you will be able to:</p> <ul style="list-style-type: none"> • Explain and communicate the importance of an evidence-based and person-centred approach to the delivery of cardiovascular and / or respiratory healthcare • Collect and correctly interpret physiological data • Generate relational hypotheses, and apply physiological insights to patient care • Recommend clinical service improvements on the basis of controlled observation and reflection <p><u>Postgraduate diploma:</u> On successful completion of PG Diploma, you will demonstrate the Learning Outcomes of the PG Certificate as well as be able to:</p>

- Critique and communicate the research-based and person-centred approaches to the delivery of cardiovascular and / or respiratory healthcare
- Collect and review the methods of collecting, analysing and interpreting data
- Reflect on decisions in the face of complexity or uncertainty in some clinical contexts
- Justify patient management options for selected instances of cardiovascular and / or respiratory healthcare

MSc Cardiovascular and respiratory healthcare:

On successful completion of MSc, you will demonstrate the Learning Outcomes of the PG Certificate and the PG Diploma, as well as be able to:

- Implement a substantial programme of original research in cardiovascular and / or respiratory healthcare
- Employ and justify the use of appropriate laboratory and clinical techniques in cardiovascular and / or respiratory healthcare setting
- Produce, analyse and interpret research data in cardiovascular and / or respiratory healthcare
- Retrieve and integrate complex published scientific information into your specific research
- Generate novel findings in cardiovascular and / or respiratory healthcare; disseminate and defend to the wider research community
- Exercise the skills of self-direction and leadership within the healthcare agenda

The Imperial Graduate Attributes are a set of core competencies which we expect students to achieve through completion of any Imperial College degree programme. The Graduate Attributes are available at: www.imperial.ac.uk/students/academic-support/graduate-attributes

Entry Requirements

Academic Requirement	<p>The minimum requirement is normally a 2:1 UK Bachelor's Degree with Honours in a relevant medical, biomedical or healthcare subject (or a comparable qualification recognised by the College).</p> <p>For further information on entry requirements, please go to https://www.imperial.ac.uk/study/pg/apply/requirements/pgacademic/</p>
Non-academic Requirements	<p>Applicants who do not meet the academic requirements above but who have substantial relevant clinical experience may be admitted following completion of the 'special case procedure'. This includes evidence of experience and may include a special qualifying assessment as per college regulations.</p>
English Language Requirement	<p>Higher requirement Please check for other Accepted English Qualifications</p>
Admissions Test/Interview	<p>Face-to-face interview (in person or via web-link) will take place between the applicant and normally 2 members of the academic team. The applicant will be asked questions to assess the 'fit' between this programme of study and the applicant's prior experience and career intentions. The interview will also provide an opportunity for the applicant to find out more about the course/programme of study.</p> <p>Ahead of the interview, the applicant will be asked to critique a paper they will be sent. A discussion of the paper will take place during the interview to assess current understanding of key issues in the research and subject area. A choice of papers will be given, although the papers will vary reflecting current research in the field.</p>

The programme's competency standards documents can be found at: TBD

Learning & Teaching Approach

Learning and Teaching Delivery Methods

The programme will take you through a programme of learning that, through the core modules and your choice of elective modules, will enable you to deepen your knowledge of cardiovascular and respiratory healthcare. The programme will use a blended learning approach to facilitate your learning and enable you to re-visit key issues in your own time and pace.

You will be taught by an expert faculty. The faculty will draw on their clinical and research experience at national and international levels to ensure you have the opportunity to engage with contemporary healthcare developments. The taught component will be delivered through face-to-face/online key note lectures, small group discussions, seminars and workshops. For some elective modules you will also learn through practical skills demonstration and acquisition.

Teaching and learning methods will vary according to the specific focus of each module but will include; keynote lectures, seminars, tutorials, journal clubs, case-based learning, small group teaching, e-learning and reflection on clinical practice.

Overall Workload

Your overall workload consists of face-to-face/ online sessions and independent learning. While your actual contact hours may vary according to the optional modules you choose to study, the following gives an indication of how much time you will need to allocate to different activities at each level of the programme. At Imperial, each [ECTS credit](#) taken equates to an expected total study time of 25 hours. Therefore, the expected **total** study time is as follows:

MSc: 2,250 hours
PG Diploma: 1,500 hours
PG Certificate: 750 hours

MSc: typically in the first term you will spend around 100 hours in lectures, seminars and workshops; in terms 2 and 3 you will spend around 60 hours each term in lectures, seminars and workshops. The rest of your time will be spent on independent learning, revision and assessments preparation, tutorials and fieldwork associated with your specialist modules and research project.

Assessment Strategy

Assessment Methods

Assessments for each module will be aligned to the learning outcomes of each module. Consequently you will undertake a variety of assessments that may include; written course work, oral presentations, poster presentations, group journal clubs, written examinations and practical examinations.

Academic Feedback Policy

Feedback will normally be provided within 4 weeks of submission of the assessments. This will facilitate your learning and help in the preparation of your subsequent pieces of work. Feedback will be provided in writing and orally. The exact turn-around time for each assessment will vary according to the length and nature of the assessments. For example, you are likely to receive feedback on an oral presentations or poster presentation sooner than the feedback on a complex piece of written work.

Following examinations, feedback will be given through provisional marks within 4 weeks of the exam date. The ratified marks will only be released following the examination board.

The College's Policy on Academic Feedback and guidance on issuing provisional marks to students is available at:

www.imperial.ac.uk/about/governance/academic-governance/academic-policy/exams-and-assessment/

Re-sit Policy

The College's Policy on Re-sits is available at: www.imperial.ac.uk/student-records-and-data/for-current-students/undergraduate-and-taught-postgraduate/exams-assessments-and-regulations/

Mitigating Circumstances Policy

The College's Policy on Mitigating Circumstances is available at: www.imperial.ac.uk/student-records-and-data/for-current-students/undergraduate-and-taught-postgraduate/exams-assessments-and-regulations/

Additional Programme Costs

N/A

Programme Structure: FULL TIME¹

FHEQ Level 7
 If you register for the **MSc** then you will study all 5 core modules (4 taught modules and a research project). You will also choose 3 elective modules from the list below.

Students registered for the **PG Diploma** will study all core modules (EXCEPT the research project). **You will** also choose 3 elective modules from the list below.

Code	Module Title	Core/ Elective	Group	Term	Credits
NHLI70001	Foundations of Cardiovascular and Respiratory Sciences	Core		1	15
NHLI70010	Study Design	Core		1 & 2	7.5
NHLI70007	Reflection and Evaluation of Clinical Practice	Core		2 & 3	7.5
NHLI70006	Quality in Cardiovascular and Respiratory Healthcare	Core		3	7.5
NHLI70008	Research Project (MSc only)	Core (MSc only)		2,3 & 4	30
NHLI70002	Cardiovascular Health: Prevention and Rehabilitation	Elective		2 & 3	7.5
NHLI70004	Innovations in the Management of Cardiovascular Disease: Acute and Community	Elective		2	7.5
NHLI70005	Pulmonary Rehabilitation and Community Respiratory Care	Elective		2	7.5
NHLI70009	Respiratory Failure and Respiratory Support	Elective		2	7.5
NHLI70003	Managing the Care of Children and Adults with Cystic Fibrosis	Elective		2	7.5
Credit Total					90

- 'Group' refers to module grouping (e.g. a group of electives from which one/two module(s) must be chosen).

¹ **Core** modules are those which serve a fundamental role within the curriculum, and for which achievement of the credits for that module is essential for the achievement of the target award. Core modules must therefore be taken and passed in order to achieve that named award. **Compulsory** modules are those which are designated as necessary to be taken as part of the programme syllabus. Compulsory modules can be compensated. **Elective** modules are those which are in the same subject area as the field of study and are offered to students in order to offer an element of choice in the curriculum and from which students are able to select. Elective modules can be compensated.

Programme Structure PART TIME

FHEQ Level 7

If you register for the **MSc part-time**

Year 1 you will study 2 core taught modules: Foundations of Cardiovascular & Respiratory Sciences and Quality in Cardiovascular and Respiratory Healthcare and choose 1 or 2 elective modules from the list below.

Year 2 you will study 2 core taught modules, Study Design and Reflection and Evaluation of Clinical Practice, take the Research Project module and choose 1 or 2 elective modules.

If you register for the **PG Diploma part-time**

Year 1 you will study the core taught module Foundations of Cardiovascular & Respiratory Sciences and choose 1 or 2 elective modules from the list below.

Year 2 you will study 3 core taught modules: Study Design, Reflection and Evaluation of Clinical Practice, Quality in Cardiovascular and Respiratory Healthcare and choose 1 or 2 elective modules.

If you register for the **PG Certificate part-time**

Year 1 you will study the Foundations of Cardiovascular & Respiratory Sciences core module, **and** you will also choose 2 elective modules from the list below.

Code	Module Title	Core/ Elective	Group	Term	Credits
NHLI70001	Foundations of Cardiovascular and Respiratory Sciences	Core		1	15
NHLI70010	Study Design	Core		1 & 2	7.5
NHLI70007	Reflection and Evaluation of Clinical Practice	Core Elective for post grad cert only		2 & 3	7.5
NHLI70006	Quality in Cardiovascular and Respiratory Healthcare	Core		3	7.5
NHLI70008	Research Project (MSc part-time only)	Core		Yr1 term 4 Yr 2 terms 1 - 4	30
NHLI70002	Cardiovascular Health: Prevention and Rehabilitation	Elective		2 & 3	7.5
NHLI70004	Innovations in the Management of Cardiovascular Disease: Acute and Community	Elective		2	7.5
NHLI70005	Pulmonary Rehabilitation and Community Respiratory Care	Elective		2	7.5
NHLI70009	Respiratory Failure and Respiratory Support	Elective		2	7.5
NHLI70003	Managing the Care of Children and Adults with Cystic Fibrosis	Elective		2	7.5
Credit Total					90

Progression and Classification

Award and Classification for Postgraduate Students

Award of a Postgraduate Certificate (PG Cert)

To qualify for the award of a postgraduate certificate a student must have a minimum of 30 credits at Level 7.

Award of a Postgraduate Diploma (PG Dip)

To qualify for the award of a postgraduate diploma a student must have:

1. passed modules to the value of no fewer than 60 credits at Level 7.
2. no more than 10 credits as a Compensated Pass.

Award of a Postgraduate Degree (MSc)

To qualify for the award of a postgraduate degree a student must have:

1. Accumulated credit to the value of no fewer than 90 credits at level 7.
2. no more than 15 credits as a Compensated Pass;
3. met any specific requirements for an award as outlined in the approved programme specification for that award.

Classification of Postgraduate Taught Awards

The College sets the class of Degree that may be awarded as follows:

4. **Distinction:** The student has achieved an overall weighted average of 70.00% or above across the programme.
5. **Merit:** The student has achieved an overall weighted average of above 60.00% but less than 70.00%.
6. **Pass:** The student has achieved an overall weighted average of 50.00% but less than 60.00%.

7. For a Masters, students must normally achieve a distinction (70.00%) mark in the dissertation or designated final major project (as designated in the programme specification) in order to be awarded a distinction.
8. For a Masters, students must normally achieve a minimum of a merit (60.00%) mark in the dissertation or designated final major project (as designated in the programme specification) in order to be awarded a merit.

Please find the full Academic Regulations at <https://www.imperial.ac.uk/about/governance/academic-governance/regulations/>

Please follow the prompts to find the set of regulations relevant to your programme of study.

Programme Specific Regulations

If you are registered for the **PG Cert or PG Diploma** and wish to continue on the programme without a break you can transfer your registration to the PG Dip or MSc after completing the core modules (Foundations in Cardiovascular and Respiratory Sciences and 2 other modules), provided you have demonstrated satisfactory academic progress.

If you are registered for the **PG Diploma** then you can transfer your registration to the MSc after completing the core modules for your programme plus 3 further modules, providing you have demonstrated satisfactory academic progress.

If you register for and successfully complete the PG cert, you may use the credit gained towards registration for the PG diploma or the MSc at a later point, provided that you complete the PG diploma within 4 years and the MSc within 5 years from initial registration for the PG certificate. You may be asked to surrender the associated PG Cert and/or PG diploma on registration for the higher award.

Supporting Information

The 2022-23 Programme Handbook is available [on Blackboard](#):

Module information is available in the [2022-23 Programme Handbook](#) on Blackboard

The College's Quality & Enhancement Framework is available at:
www.imperial.ac.uk/registry/proceduresandregulations/qualityassurance

The College's Academic and Examination Regulations can be found at:
www.imperial.ac.uk/about/governance/academic-governance/regulations

Imperial College is an independent corporation whose legal status derives from a Royal Charter granted under Letters Patent in 1907. In 2007 a Supplemental Charter and Statutes was granted by HM Queen Elizabeth II. This Supplemental Charter, which came into force on the date of the College's Centenary, 8th July 2007, established the College as a University with the name and style of "The Imperial College of Science, Technology and Medicine".
www.imperial.ac.uk/admin-services/secretariat/college-governance/charters/

Imperial College London is regulated by the Office for Students (OfS)
www.officeforstudents.org.uk/advice-and-guidance/the-register/

This document provides a definitive record of the main features of the programme and the learning outcomes that a typical student may reasonably be expected to achieve and demonstrate if s/he takes full advantage of the learning opportunities provided. This programme specification is primarily intended as a reference point for prospective and current students, academic and support staff involved in delivering the programme and enabling student development and achievement, for its assessment by internal and external examiners, and in subsequent monitoring and review.
